SUMMARY

Cloud DevOps Engineer with a Bachelor's in Computer Science, a professional background in Finance, and a proficiency in .NET web application and microservices development.

SKILLS

- **DevOps:** Ubuntu | Docker | Kubernetes | AWS | Jenkins | Terraform | Ansible
- **AWS Environment:** IAM | ECS | EC2 | Fargate | ECR | EKS | ELB | NLB | ALB | S3 | VPC | RDS | Subnets | CloudFormation
- **Languages:** Python | Bash | SQL | Git
- **Databases:** MySQL | PostgreSQL
- **Web/API:** .NET/C# | JavaScript | HTML | CSS | Bootstrap | Regex | Postman | Swagger

EXPERIENCE

Smoothstack - McLean, VA (Remote) | Cloud DevOps Engineer | 11/2022 - Present

Aline Financial – Online Banking Application

- Architected the infrastructure to deploy a highly scalable, available, and fault-tolerant 3-tier web application via Terraform
- Designed and maintained a robust CI/CD pipeline using Jenkins, GitLab, and SonarQube, resulting in efficient automation and seamless deployments to AWS
- Produced code that adheres to established security standards and quality control protocols using the Atlassian Suite (Jira/Confluence) and Git Flow in a Scrum environment
- Initiated Spring Boot microservices and React/Angular Node applications using Dockerfiles and Docker Compose to generate Docker images for cloud deployment
- Automated service operations and application installation using Python and Bash scripts
- Documented the team's cloud architecture efforts including new tool integrations in Confluence, ensuring clear and concise communication across the organization and facilitating knowledge sharing and collaboration among team members
- Developed gray box smoke tests using Python for Java Spring Boot microservices to validate basic functionality before integration into a CI/CD pipeline

AWS Environment: IAM, ECS, EC2, ECR, EKS, ELB, Lambda/Boto3, S3, VPC, RDS, Subnets, CloudFormations, LoadBalancers.

Vermont Idea Company - Shelburne, VT (Remote) | Systems Software Engineer | 10/2022 - Present

- Extracted project requirements from Subject Matter Experts (SMEs) to document design concepts, manage integration work, and enable effective communication with software and business teams
- Maintained and managed systems documentation, including Software Design Description
- Implemented and converted existing MATLAB scripts to Python/Kotlin, adjusting the architecture to conform to an object-oriented programming environment
- Analyzed algorithm performance, identified opportunities for optimization and efficiency improvements, and proposed solutions

Environment: Python, MATLAB, Kotlin, Confluence, Jira

Lynda Foster

Benefit Plans Inc - Los Angeles, CA | Benefit Plans Analyst | 03/2019 - 09/2022

- Developed, implemented, and maintained digital operational procedures that manage \$100M+ in monthly contribution payments to pre-taxed PH&W (pension, health, and welfare) benefit accounts
- Produced the training knowledge base for the Employer Services department which expedited the onboarding of new employees
- Eliminated 40% of the processing time needed to reconcile discrepancies by automating the conversion of raw data to readable format using Excel macros and PowerShell scripts
- Resolved escalated client issues by collaborating with interdepartmental teams to ensure solutions were in compliance with company guidelines and HIPAA regulations
- Cultivate and maintain long-term business relationships with diverse teams among key networks, payroll companies, employers, and local unions to ensure benefits packages complied with contract, ERISA, & other federal guidelines.
